# **Reversing a Linked List**

# **Example**

### First Loop

next points to 2
current.next points to null
prev points to 1
current points to 2

### Second Loop

next points to 3
current.next points to 1
prev points to 2
current points to 3

### **Third Loop**

next points to 4
current.next points to 2
prev points to 3
current points to 4

### **Fourth Loop**

next points to 5
current.next points to 3
prev points to 4
current points to 5

#### Fifth Loop

current.next points to 4 prev points to 5 current points to 6

next points to 6

## Sixth Loop

next points to null

current.next points to 5

prev points to 6

current points to null

prev === head, so loop exits

#### **Update reference pointers**

this.tail = tail this.head = prev
